

I am very familiar with the operations of both print and broadcast media. It has been evident to me, (as a person viewing things from the inside out for a long time, at least 10 yrs), that an ongoing, targeted campaign has been established to eliminate free speech and muffle the public. Through progressive conservative control of the media, right wing groups regardless of political affiliation, are hell bent on suppressing the views of those that do not agree with them. Their goal is to create a monopoly for fascist thinking organizations such as Tribune, the Washington Times, and the FOX Propaganda News Machine. For the FCC to aid and assist these oppressive news services is paramount to an act of treason by the FCC. Liberty and freedom are not about oppression, suppression, or control. Liberty is about dissent, discussion, and being afforded the opportunity for one to express opposing opinions.
